	Fee Received by:	Receipt #:	Total Fee: Date:

Pictured above is the Existing Sign at the Spruill Education Center

- The sign is very old and unattractive;
- The sign sits 35' back from the curb and is too far back to be effective;
- The current beige and green color scheme does not match the beige and green of the building (too bright; too yellow);
- For consistency in branding, the Spruill Center wants to replace the existing monument sign with another one very similar to the one installed at the Spruill Gallery on Ashford Dunwoody Road. A photograph of that sign is attached.

Pictured above is the Sign at the Spruill Gallery (before the cap was affixed)

- This style monument sign is what is desired at the Spruill Education Center on Chamblee Dunwoody Road;
- Overall height of the sign would be 6' (replacing an 8' high sign);
- The concrete base of the sign above is 110"L x 27"W x 12"H;
- The sign box is 76"W x 60"H (depth to be determined - please advise);
- The sign has the same image both sides (see drawing attached);
- The sign will have an information change area on both sides as shown above. That sign uses 6 fixed bolts with wing nuts, on both sides of the sign, to allow for the information changes which are done on coroplast. Channel strips or some other mechanism could also be considered.
- The information change area is 72"W x 21"H or 10.5 S.F.
